IDENTIFIERS *Washington

ABSTRACT

Designed for prospective students at Washington community colleges, this guide provides information about the state's 27 community colleges, their programs, costs, instructors, locations, and admissions procedures. The guide begins by offering general information related to the characteristics of community colleges, two-year college students, campuses, faculty, degrees offered, student life, instructional programs (i.e., academic transfer; vocational education, remedial, basic education, high school completion, and recreational courses), costs, financial assistance, application procedures, and equal opportunity compliance. Brief descriptions are then provided for each community college, highlighting the unique characteristics of each school and including a list of the vocational programs offered. A chart listing vocational programs by geographic area and community college concludes the guidebook. (LL)

What is a community college?

A community college is a local education center for people beyond high school age. It's like a four-year college or university in some ways; it's also similar to a vocational school in some ways. These features set apart community colleges from other kinds of institutions:

Convenience

There are 27 community colleges in Washington and most are within easy commuting distance. Many smaller towns have extension centers.

Low cost

Tuition and fees are less than those charged by four-year institutions. Most students live at home and avoid the cost of room and board.

Variety

A wide variety of vocational and academic courses and programs is available.

Accessibility

Anyone who is 18 years of age or a high school graduate will be admitted to a community college.

Personal Attention

Classes are relatively small and quality teaching is emphasized.

Involvement

There are many student activity programs and it is easy for a student to become involved.

Perhaps most important is that community colleges are committed to giving every individual the opportunity and the encouragement to succeed, regardless of age, income, background or previous educational experience.

Students

In Washington, more than half the students enrolled in higher education attend community colleges. Because there are no grade-point or test-score requirements to enter a community college, students range in ability from the brightest to those who did poorly in public schools but want another chance to improve themselves. Many community college students attend school part-time while working full- or part-time. In general, community college students are more varied in age, interest, income and background than are those in other kinds of institutions.

Campuses

Community college campuses generally include classrooms, laboratories, shops, library/media centers, auditoriums, cafeterias, study areas, student centers and physical education facilities. Community colleges also offer courses at many locations away from the campus. Campuses are likely to be as busy in the evenings as they are during the day since many classes are offered at times other than conventional daytime hours. The colleges are essentially "commuter schools," although a few operate dormitories.

Faculty

Community college instructors are employed solely for their ability to teach. Academic instructors are required to have at least a master's degree. Many have doctorates. Vocational instructors are required to have substantial experience in the subject they teach. Each vocational program has an advisory committee made up of representatives of employees and employers to help colleges assure that vocational programs are meeting the needs of business and industry. Many community college instructors remain in their professional fields and teach part-time. This also helps keep vocational education up-to-date with the needs of employers.

Degrees

Community colleges award associate degrees, certificates or diplomas to students who satisfactorily complete a vocational or academic program. For adults who did not complete high school, community colleges also provide the opportunity to obtain a high school diploma or General Educational Development (GED) Certificate, the equivalent to a high school diploma.

Student life

Community colleges offer a wide variety of student activities; and because community colleges are two-year institutions, it's easy to get involved in activities from the beginning. Among the activities available at most community colleges are music, drama, art, photography, student newspaper, campus government, social events, intramurals, and intercollegiate athletics. Visiting artists and lecturers are sponsored by many community colleges. Many special interest organizations are available including several which are keyed to vocational students career fields.

Community college instructional programs

Community colleges provide a wide variety of instructional programs. No other institution offers the opportunity for students to take both academic and vocational courses. No other institution makes it possible to transfer from an academic to a vocational curriculum or vice versa. Community colleges also provide remedial courses, programs which permit adults to complete grade school and high

school, and a variety of student-funded recreational and personal-interest courses.

Many academic and vocational courses are offered evenings to enable those who must work full-time to pursue a degree program. For students unable to reach the nearest campus, courses are offered at some 500 extension sites and through educational television.

All Washington community colleges are accredited by the same association which accredits Northwest four-year institutions.

Academic transfer

Each community college offers a transfer program which provides the opportunity for students to complete the first two years of a bachelor's degree program before transferring to a four-year institution. Most students who complete a two-year transfer program at a community college go on to earn a four-year degree. Community college transfer students do as well at four-year institutions as do students who begin their program at the four-year colleges and universities. Community colleges and four-year institutions maintain transfer agreements which generally assure that the student who earns a community college associate degree will be able to transfer a maximum of 90 credits to a four-year institution and be admitted as long as space is available.

The transfer agreements do not guarantee that all community college courses will be accepted toward the specific degree program in which the student is interested.

Community college students should plan coursework to meet requirements of specific degree programs offered by a four-year institution. Students should also work closely with their counselors and contact the four-year institution to which they plan to transfer to be sure courses will transfer.

Vocational education

Washington's community colleges offer some 900 vocational education programs leading to employment in 350 different occupations. Many of the programs offer several options. For example, a marketing and sales program might offer options in salesmanship, purchasing, marketing, real estate, insurance and general business.

In addition to programs designed to train students for their first jobs, community colleges also offer many courses which enable employed persons to improve their job skills, prepare for promotions and meet the licensing requirements for their vocations.

Many vocational programs are organized so students may enroll at any time and leave when sufficient job skills are acquired. Other programs permit entry at the beginning of any quarter.

In many community college vocational programs, students can make arrangements to attend school while working in their chosen vocational field. These "cooperative education" arrangements provide realistic experience and the opportunity to see if the vocation is really the right one.

Certain occupations are apprenticeable. In other words the student enters into a written agreement with an employer to provide training. Community college students enrolled in training for apprenticeable occupations may receive up to two years of credit through the appropriate Joint Apprenticeship Training Committee. Instructors will assist interested students in contacting the appropriate committee.

Community college vocational education graduates do very well in finding jobs – often with the help of their instructors or the college placement officer. Several follow-up studies indicate unemployment rates are much lower among community college vocational graduates than the state as a whole.

If you are interested in a particular vocation and you want to know which colleges offer it, see the index and grid on pages 19 through 26. If you are interested in a specific college and want to know what vocational programs it offers, see the college descriptions on pages 4 through 18.

Remedial, basic education & high school completion courses

Many students entering colleges and universities require some kind of assistance to help them succeed. They may need help in basic math, reading or writing, or simply in learning how to study. Each community college offers what is usually called a "developmental" program to help students acquire the necessary skills to proceed with college-level work.

An adult basic education program is provided by most community colleges for persons who did not complete elementary school. High school completion programs are offered for adults seeking a high school diploma or completion certificate before proceeding with a college-level program. English-as-a-Second Language courses are generally available for students who are not fluent in English.

Recreational courses

Most courses of a personal interest or recreational nature are offered during evening hours. Fees may be higher since recreational courses do not receive state funds and are entirely paid for through student fees.

What does it cost to attend a community college?

Community college tuition and fees are set by the state legislature and are lower than those charged by four-year institutions. 1983-84 community college tuition and fees are:

Full-time student
(10 credits or more)
Resident $193 per quarter
Non-resident $761 per quarter

Part-time student
(9 credits or less)
Resident $19.30 per credit per quarter
Non-Resident $76.10 per credit per quarter

These are maximums. Some community colleges charge slightly less because of lower student fees. Students enrolled for more than 18 credits pay $16.95 for each credit over 18.

There are, of course, other costs. In budgeting expenses for attending a community college, also include such costs as books and supplies, room and board, transportation and incidental expenses.

What if I can't afford it?

Although community college costs are comparatively low, not everyone can afford them. Student financial aid is available to help make up the difference between the cost and what students can afford to pay.

In general there are three kinds of student aid – most financed by federal and state governments:

Scholarships, Grants & Tuition Waivers.
Need not be paid back by the student.

Loans
Some at low interest rates, which must be paid back, but after the student leaves college.

Work/Study
Programs of part-time, paid work.

For students who qualify for financial aid, most colleges arrange for a "package" of aid which includes grants, loans and perhaps work/study.

The best way to find out if you're eligible for financial aid is to obtain a Financial Aid Application Form from your high school counselor or a community college financial aid office.

Most financial aid is based on the student's need, but each college offers a number of scholarships which are not based on need and are generally financed by private sources. Some companies and organizations make scholarship awards to children of employees or members. The financial aid office can provide information on scholarships as can high school counselors. Scholarship guides are available in libraries. Dependent students should have their parents check with their employers or organizations.

In general it is the policy of the state of Washington that students should not be denied the opportunity to pursue a college education because of the lack of money. But there is not always enough financial aid for everyone who qualifies. Therefore it is important to begin looking into financial aid as early as spring of the junior year of high school. Inquire at the high school counseling office or college financial aid office.

To find out more about community colleges

The following pages provide a brief description of each community college in Washington. Call or write colleges of interest for general college or specific program information. Check with your high school counselor to find out when your school or a nearby location will be visited by a community college representatives. If possible, arrange for a visit of the college by calling the admissions office.

How to apply

Once you've made a decision, contact the admissions office of the community college you plan to attend. You will probably be asked to complete the State of Washington Uniform Community College Admission Form and furnish a copy of a transcript from the last school you attended. If you have not previously completed a standardized college placement test (SAT, SPCT or ACT), you may be asked to take a placement examination to help determine your program.

Equal opportunity

Washington community colleges provide equal opportunity in education and employment and do not discriminate on the basis of race, color, national origin, age, religion, sex or handicap in accordance with Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1974.

Bellevue Community College

3000 Landerholm Circle
Bellevue, WA 98007
Telephone (206) 641-2222

Recognizing that education can be one of the best investments you will ever make, Bellevue Community College has established programs that allow you to attain your personal educational goals as quickly and efficiently as possible.

Because of BCC's excellent reputation among four-year institutions in Washington State, many students elect to start their college careers studying in the college transfer program. Still others find that the two-year Associate in Arts degree or one of the college's 22 vocational programs can provide a direct path to a rewarding career. Some of BCC's unique and popular programs are radiology, media technology, and bio-medical photography.

Big Bend Community College

Moses Lake, WA 98837
Telephone (509) 762-5351, ext. 228

Big Bend Community College, founded in 1962, serves the upper Columbia Basin of central Washington from its campus at Moses Lake. Enrollment numbers more than 2,500 full- and part-time students in vocational and academic transfer programs.

Big Bend's nationally recognized commercial flight program has produced more than 1,000 qualified pilots, most of whom are engaged in aviation or related fields. Excellent physical education and sports facilities are available with generally good weather conditions.

Big Bend has two large residence halls, and an additional housing area is available adjacent to the campus for non-commuter students. Food service is also available from a student cafeteria and snack bar.

Centralia College

P.O. Box 639
Centralia, WA 98531
Telephone (206) 736-9391

Centralia College, Washington's oldest community college, occupies 20 acres in a residential area two blocks from downtown Centralia. Begun in 1925, it was almost exclusively an academic transfer institution during its first 30 years. In contrast, today the college offers an equal concentration in academic and vocational courses.

More than 1,000 students attend campus classes during the day. An extensive evening curriculum is also available.

The college is one of the state's pioneers of Telenet, a two-way audio communications network. The network connects students in satellite classrooms throughout Lewis and Thurston Counties with classes offered on campus.

Clark College

1800 E. McLoughlin Blvd.
Vancouver, WA 98663
Telephone (206) 699-0113

Blending tradition with high technology has emerged as an informal theme at Clark College as it celebrates its 50th anniversary in 1983-84.

The college started during the Great Depression with fewer than 50 students and now annually serves approximately 10,000 persons. It has occupied six campuses, the current one since 1958.

Perhaps partly because of its more independent history, the people who teach at Clark College have long felt it is an outstanding community college.

Today with large electronics firms making a major impact on the area, the college strives to add training for employment in high tech industries to its already strong efforts in academic and vocational education.

Columbia Basin College

2600 N. 20th Avenue
Pasco, WA 99301
Telephone (509) 547-0511

A comprehensive community college founded in 1955, Columbia Basin College consists of a 156-acre Pasco campus and a two-acre Richland satellite campus.

CBC offers academic degree programs paralleling the first two years of a four-year college. Because the area has no four-year college, CBC has a unique relationship with several universities providing for local completion of bachelor's and master's degrees.

Vocational/technical programs are available for those seeking employment in industry.

The Tri-Cities is a rapid growth area whose economic base is nuclear and hydroelectric power, agriculture and research. This fact offers students the opportunity to work while attending college with excellent employment opportunities after graduation.

Diesel Mechanics
Machine Shop
Welding
Fire Science
Administration of Justice

Edmonds Community College offers a variety of progressive programs designed to meet the academic, vocational, cultural and social needs of its students and the community.

Located on a 100-acre wooded campus in Lynnwood, the college facilities include student services, vocational and academic classrooms, laboratories, a media center and library, a gymnasium, student center and dining center.

Most instruction is on a quarter system of three 11-week terms with a shorter summer session. Classes are tailored to students in college transfer (liberal arts), occupational education, continuing education and developmental education areas through individual, certificate and degree programs.

Everett Community College

801 Wetmore
Everett, WA 98201
Telephone (206) 259-7151 or 339-2441

Everett Community College offers quality programs to meet educational and career needs in nursing, computer programming, aircraft mechanics, electronics, engineering technology, photography, welding, accounting and many other fields. We also have strong departments of mathematics, English, drama, psychology, chemistry, physics, history and speech.

The Everett faculty is second to none, and members of the counseling staff have answers to both career and personal concerns.

Graduates from Everett perform on a par with, or better than, students who attend all four years at colleges and universities. For other students vocational and technical classes provide the up-to-date skills needed for employment.

Everett Community College is a great place to start your college education.

Fort Steilacoom Community College

FSCC Campus
9401 Farwest Drive S.W.
Tacoma, WA 98498
Telephone (206) 964-6500

Fort Steilacoom Community College is known as a friendly, quiet campus. The college, founded in 1967, grew steadily and rapidly to become the largest college in Pierce County and one of the largest community colleges in the state.

FSCC's district extends throughout the southern and eastern section of the county, serving off-campus students in extension sites near their homes. Approximately 8,000 students are enrolled throughout the district.

Whether working toward the goal of transferring to a four-year college or seeking training in one of the many highly-rated vocational programs, at Fort Steilacoom you'll find a friendly, caring atmosphere – a great place to prepare for your future.

Grays Harbor College

Aberdeen, WA 98520
Telephone (206) 532-9020
Toll free 1-800-562-4830

Grays Harbor College, a community college, was conceived in 1929 by a group of Aberdeen citizens and in 1930 was incorporated by the Aberdeen School Board. Over the years the college has continued to serve men and women of all ages from Grays Harbor and Pacific counties. During 1981-82 the college served nearly 8,000 students.

Grays Harbor College has six objectives: (1) to provide a general education; (2) to offer students transferring to four-year colleges the necessary prerequisites; (3) to offer vocational and technical education; (4) to offer classes for adults; (5) to provide basic skill training for students who wish to complete high school or attain higher basic skill levels; and (6) to assist students in career planning and decision making.

Green River Community College

12401 S.E. 320th Street
Auburn, WA 98002
Telephone (206) 833-9111

Green River Community College is located on a lush, 168-acre wooded site where nature remains primarily undisturbed. Even more impressive than the majestic natural campus environment is the caring attitude Green River faculty, staff and administrators have for students. "Think student, then decide," has been GRCC's motto since the college first opened its doors in 1965.

At Green River everyone cares about you, the student. Whether you're fresh out of high school, whether you've been out of school for many years, whether you've suddenly found it necessary to retrain for a new career – whoever you are, wherever you come from – Green River exists to help you attain your goals. We never forget that we're here for you!

Nearly 9,500 students from Southwest King County attended Highline Community College in the fall of 1981. Located midway between Seattle and Tacoma at South 240th and Pacific Highway South, Highline has the largest community college library in the state – part of its 30 modern buildings on an 80-acre site west of Interstate 5 overlooking Puget Sound.

The college also has a comprehensive center with all student services available in one location, including health services without charge on a primary care basis.

Highline has a fine academic reputation and offers a unique Honors Scholar Program. Nearly 30 student clubs are available, as are varsity men's and women's sports.

Lower Columbia College

1600 Maple Street
Longview, WA 98632
Telephone (206) 577-2300

Lower Columbia College, one of the oldest community colleges in the state of Washington, is preparing to celebrate its 50th anniversary in 1984. LCC is named for the mighty Columbia River which separates its home city of Longview from neighboring Rainier, Oregon. In addition to serving residents of Cowlitz and Wahkiakum Counties, LCC also serves many nearby Oregon residents.

The picturesque campus has expanded in recent years through remodeling of older facilities and addition of new buildings. The Alan Thompson Learning Resources Center and the Don Talley Vocational Building, sources of pride for the entire community, were named for two of the district's state legislators.

North Seattle Community College

9600 College Way N.
Seattle, WA 98103
Telephone (206) 634-4507

North Seattle Community College is located on a 66-acre tract across the Seattle freeway from the Northgate Shopping Center. Opened in 1970, the college features some of the most advanced equipment and facilities to be found in a two-year college.

Some 7,000 students attend NSCC each quarter, 45 percent of them in the evening.

In addition to the Associate in Arts and Associate in Applied Science degrees, NSCC offers an Associate in Fine Arts in art and music, a Certificate in Fine Arts in drama, art and music, and an Associate in General Studies degree.

A broad spectrum of technical and human service training programs is offered.

Olympia Technical Community College is a small, dynamic college set in the heart of the state's capital. The college's wooded campus has been designed to provide an exciting learning atmosphere in a beautiful natural environment.

Until 1982, Olympia Tech was the state's only community college focusing entirely on vocational-technical education. Now the college offers a well-rounded college transfer program as well as occupational and recreational programs.

With its unique technical background, the college has also placed a strong emphasis on high technology to meet the area's growing business and industrial demands. Olympia Tech serves the residents of Thurston and Lewis counties with an annual full-time enrollment of approximately 1,800 students.

Olympic College

16th and Chester
Bremerton, WA 98310
Telephone (206) 478-4505

Founded in 1946 as part of the public school system, Olympic College has grown with the communities it serves. The two-county service area of Kitsap and Mason counties shares with the main campus location in Bremerton a view of the picturesque Olympic Mountains. A centralized pedestrian mall on the 20-acre campus provides covered walk areas between the assorted campus buildings.

Courses are offered students interested in transfer or vocational programs. Adult and continuing education as well as recreational classes are available. Remedial programs are designed for students desiring to improve basic skills. Extension centers provide parallel courses at locations convenient to students.

Peninsula College

1502 E. Lauridsen
Port Angeles, WA 98362
Telephone (206) 452-9277

With full-time enrollment of about 1,000 students, the focus of one of the state's smallest community colleges can be on quality instruction, advising and counseling appropriate to each student while offering comprehensive transfer, vocational-technical and developmental offerings.

The campus, completed in 1966, includes a student center, little theatre, dormitory, gymnasium, tennis courts, athletic field and 35,000-volume library/multimedia center in a wooded setting with views of nearby straits and snow-capped peaks. Facilities recently were added for an expanding industrial electronics program. The location enhances programs such as forestry, fisheries and natural sciences as well as recreational activities including canoeing, skiing and hiking.

Seattle Central Community College

1701 Broadway
Seattle, WA 98122
Telephone (206) 587-3800

Located in the city's lively Capitol Hill district, Seattle Central Community College is a truly urban campus that prides itself on the diversity of its student population. The college educates the largest number of ethnic minority and foreign-born students of any community college in the state. Its 8,500 plus students range in age from 18 to over 80 with most being in their late 20's.

Vocational education at the campus site dates back to the 1940's; however, current enrollment is evenly divided between a comprehensive college transfer program and 42 one- and two-year vocational program offerings.

Shoreline Community College

16101 Greenwood Avenue North
Seattle, WA 98133
Telephone (206) 546-4621

Shoreline Community College, which opened in January, 1964, is housed in 22 new buildings on a beautifully landscaped campus of 82 acres located in northwest suburban Seattle. The facilities include a library with 65,000 volumes, an instructional materials center, a professionally equipped little theatre, and a multi-facility gymnasium.

Although there are no residence halls at Shoreline Community College, the college is located within easy commuting distance of many apartments and rooming houses.

Fall quarter enrollment in 1981 was 5,057 full- and part-time students, 2,726 men and 3,331 women.

Skagit Valley College

2405 College Way
Mount Vernon, WA 98273
Telephone (206) 428-1261

Opened in 1926 as Mount Vernon Junior College, Skagit Valley College is the second oldest community college in the state. On its solid beginning as a liberal arts college, it has built a strong curriculum which serves Community College District Four (Skagit, Island, and San Juan Counties).

The main campus is located on 85 acres on the northeastern edge of Mount Vernon in a rural and agricultural area, but within easy driving distance of Seattle and Vancouver, B.C. Whidbey Branch is located in Oak Harbor, and there is a South Whidbey Center at Langley. The surrounding area – Mount Baker, North Cascades National Park, the San Juan Islands, and the Skagit River – offers year-round recreation.

South Seattle Community College

6000 - 16th Avenue S.W.
Seattle, WA 98106
Telephone (206) 764-5300

Founded in 1970, South Seattle Community College is situated a few miles southwest of downtown Seattle on a 63-acre campus which offers a panoramic view of the Seattle skyline and surrounding mountains.

Of the 6,000 students who attend each quarter, 70 percent are enrolled in vocational/technical programs, where they can expect a bright future for their newly developed skills.

SSCC also offers the opportunity to complete an Associate of Arts degree on the way to a bachelor's degree at a four-year institution. In addition, adult general education, apprentice related training, industrial first aid, vocational teacher training, and student-supported recreational classes are offered.

Centrally located close to the industrial community and applicable employment, SCC's campus is a separate, spacious 88-acre home for classrooms, shops and student services.

Although the primary emphasis is vocational-technical education, SCC offers a full schedule of liberal arts classes, many tailored to meet the specialized needs of occupational groups. Students may earn an Associate in Arts degree.

Occupational training varies in length up to three years. Degrees awarded include Associate in Applied Science and Advanced Technology or Professional Diploma.

Ten major campus buildings include fully-equipped health occupations, science, agriculture technology, automotive and heavy equipment centers, as well as a library, recreational complex, administrative services area and a lively student center.

On its historic Fort Wright military post site above the Spokane River, SFCC's 113-acre campus is distinguished by the contrast of open spaces and streamlined modern buildings.

Emphasis is on liberal arts and pre-professional training leading to Associate in Arts degrees and/or transfer to four-year institutions.

Associate in Applied Science degree programs are two-year concentrated courses in a wide variety of occupational areas. Three-year technical programs lead to specialized professional diplomas.

Fifteen bright modern buildings house classrooms, laboratories, little theater, art gallery, television and radio broadcasting studios, music/performing arts center, photography lab, physical education/gymnasium, 3,500-seat stadium and a popular, full-service student center.

Tacoma Community College

5900 S. 12th Street
Tacoma, WA 98465
Telephone (206) 756-5035

Tacoma Community College serves the educational needs of more than 200,000 residents of the Tacoma-Pierce County areas of the Puget Sound region of western Washington.

The college offers students the cultural and educational assets of an urban setting, a large landscaped campus in west Tacoma and quality instruction.

Pre-professional programs provide the first two years of training in such fields as engineering and law, and occupational programs like the unique energy management program offer the most up-to-date training available.

More than 6,000 students enroll each quarter in day, evening and Saturday classes on campus and in off-campus locations in downtown Tacoma and Gig Harbor.

Walla Walla Community College

500 Tausick Way
Walla Walla, WA 98362
Telephone (509) 522-2500

Walla Walla Community College, founded in 1967, offers a wide variety of academic, vocational and continuing education courses for more than 5,000 students in southeastern Washington. Its modern, attractive campus, which opened in 1974, creates a nearly ideal environment for learning and personal growth.

The college's location in the city of Walla Walla, with a population of 25,400, provides varied opportunities for recreation and entertainment. Students enjoy alpine sports in the nearby Blue Mountains and swimming and boating in the area rivers. Both the college and the community sponsor numerous entertainment and performing arts events, and strong, varied athletic programs in football, basketball, volleyball and rodeo attract enthusiastic crowds.

Wenatchee Valley College

1300 Fifth Street
Wenatchee, WA 98801
Telephone (509) 662-1651

Wenatchee Valley College, founded in 1939, is located on a beautiful 56-acre campus in the "Apple Capital of the World" midway between Seattle and Spokane, and offers outdoor recreational opportunities 300 sunny days a year.

For skiers, Mission Ridge is 20 minutes from the campus and provides excellent skiing from early December to late April. For outdoor recreation enthusiasts, the Cascade Range and the Columbia, Wenatchee and Okanogan Rivers offer a variety of natural resources to explore.

Two campuses, WVC in Wenatchee and WVC-North in Omak, serve 3,085 students and a 10,000 square-mile area stretching from the east slopes of the Cascade Mountain Range to the Canadian border.

Whatcom Community College

5217 Northwest Road
Bellingham, WA 98226
Telephone (206) 676-2170 or 384-1541, ext. 38

Whatcom Community College has served the community as well as many non-resident students since 1970. Accreditation was granted in 1976 by the Northwest Association of Schools and Colleges.

A college without a campus, Whatcom offers the associate degree in both academic and vocational areas and provides preparation for further higher education and career entry and advancement.

The institution seeks to serve a diverse clientele at instructional sites throughout Whatcom County in a variety of public and private facilities.

Significant individualized methods of instruction have been developed to serve people with special and unique goals in addition to conventional group instruction.

Yakima Valley Community College

Sixteenth Avenue and Nob Hill Boulevard
Yakima, WA 98907
Telephone (509) 575-2372

Yakima Valley Community College provides top quality education at an affordable price to citizens of Community College District 16, which consists of Yakima, Kittitas and parts of Klickitat counties. Most YVC students live within easy commuting distance from the main campus in Yakima or near extension centers.

The college's academic transfer program began in 1928 and has provided an opportunity for thousands of Central Washington residents to pursue an education. The quality of the education has been proven by student success in transferring to universities and in subsequent careers.

Vocational/technical programs permit students to learn job skills leading to employment in two years or less. Occupational students have been highly successful in obtaining jobs after graduation.
